

Ready for Guidewire Accelerator for Guidewire InsuranceSuite

Accelerate your success with OnBase for Guidewire

Speeds integration with Guidewire

Automates processes

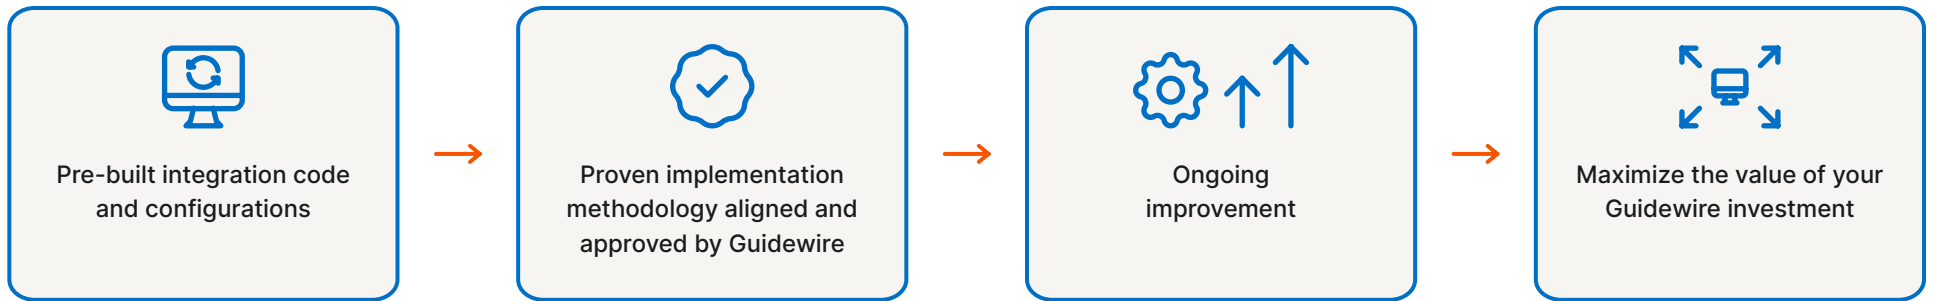

Increases speed and accuracy

Cloud ready

Working together, OnBase and Guidewire help claims, underwriting and billing professionals get work done more efficiently and effectively. By decreasing your dependency on paper, you reduce manual errors, promote secure file sharing and deliver content in context. With OnBase, you minimize organizational, technical and financial risks by quickly integrating your Guidewire system with the only enterprise content services platform in the Guidewire PartnerConnect Solution program.

Pre-built integration code and configurations

The Ready for Guidewire accelerator for Guidewire InsuranceSuite makes it unnecessary to reinvent the wheel for each client engagement, helping property and casualty (P&C) customers reduce the time, costs and risks associated with incorporating content service capabilities as part of their Guidewire core transformation initiatives. With true point-and-click configuration that minimizes the need for custom coding, the OnBase Solution Accelerator reduces your time-to-market for new products or services, decreases capture and document management implementation time and costs by 50 percent or more, and improves project team performance.

More than software alone, the OnBase Solution Accelerator represents a package of Guidewire-tested and approved software capabilities, Hyland professional services and ongoing customer support. It features a pre-configured solution that addresses common use cases in claims, policy and billing — derived from real-world implementations. You can use these configurable component capabilities as-is for a solution to a particular problem, or extend as needed for a customized solution. Guidewire has reviewed the accelerator to assure adherence to software design principles and quality criteria, and it has been fully tested by both Hyland and Guidewire to confirm they effectively integrate with each OnBase and Guidewire release.

Proven methodology aligned and approved by Guidewire

Instead of starting the discovery process from scratch, Hyland begins a Guidewire integration implementation project half-way done. Hyland’s Guidewire-trained insurance services team utilizes the same Agile methodology used by the certified implementation partners at Guidewire. The experienced team of project managers, solution architects and installation professionals have integrated OnBase with more than 65 Guidewire centers at more than 25 unique organizations. These opportunities have given them the ability to develop an in-depth knowledge of the challenges faced by P&C carriers replacing their legacy systems.

Ongoing improvement

Replacing core systems is a complex process that often requires several years to complete. Hyland provides dedicated, Guidewire-certified product development, quality assurance and technical support resources to ensure the ongoing improvement, functional integrity and upgradeability of solution accelerators for the duration of your core replacement initiative and beyond. Hyland charges no additional fees for enhancements to solution accelerator product components, nor are there any additional costs for regression testing of THE accelerator against new versions of Guidewire InsuranceSuite.

Maximizing the value of your Guidewire investment

Offering deep Guidewire-specific knowledge and experience, Hyland's dedicated technical support team for Guidewire customers ensures a smooth transition from testing user acceptance to taking the solution live and into day-to-day operation.

With OnBase, you get a content *Ready for Guidewire* validated and ready to go. A purpose-built accelerator for the full Guidewire InsuranceSuite empowers you to speed your integration and implementation by up to six months. Now that's acceleration.

”

Inbound and outbound customer claims communication must be handled easily and efficiently if any insurer hopes to compete in our evolving industry. Guidewire ClaimCenter, integrated with OnBase, fulfills that requirement.
