Hyland™

5 reasons
to choose Alfresco
Platform as a Service

47% of decision-makers report managing too many content-related technologies and partners. *(Source: A Forrester Consulting Thought Leadership Paper Commissioned by Hyland, 2024.)*

In today's digital landscape, businesses need more than just technology; they need a strategy that maximizes efficiency, reduces costs and accelerates innovation. Alfresco Platform as a Service (PaaS) offers a cloud-native environment designed to scale your business and deliver results.

Here are five key reasons to make the switch to Alfresco PaaS:
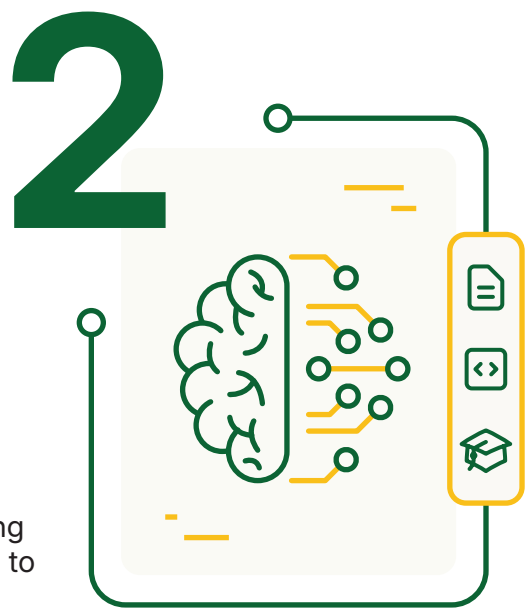

1

Cloud-native efficiency

40% of businesses have digital infrastructures that struggle to meet external business demands at scale. *(Source: Deloitte, 2024 MarginPLUS, 2024.)*

Alfresco PaaS's cloud-native architecture, built with microservices and containerization, allows businesses to overcome legacy infrastructure challenges to deploy and scale quickly, handle changing content volumes and meet evolving business requirements.

Innovate with automation and AI integration

2

81% of content leaders believe AI-enabled automation will significantly improve content-heavy processes within the next 2–3 years. *(Source: Forrester Report: Transforming Processes With Intelligent Content Services, 2024.)*

Alfresco PaaS provides organizations instant access to the latest technology updates, including AI and automation tools, delivering new insights and accelerating content-centric business processes while allowing them to deploy new applications and features quickly.

3

Cost efficiency

201% ROI and payback benefits in less than six months for companies running Alfresco Content Services on AWS. *(Source: Forrester Research, Your Future Fit Technology Strategy: Adaptive, Creative, and Resilient, 2020.)*

Alfresco PaaS offers pay-as-you-go pricing and "instant-on" functionality that reduces hardware and software costs, frees up development time, enhances disaster recovery and avoids the need for expensive, up-front infrastructure investments.

Enhanced security and governance

4

42% of organizations face challenges with critical content hidden in information silos, making comprehensive governance crucial. *(Source: Forrester Report: Transforming Processes with Intelligent Content Services, 2024.)*

Advanced security features — including encrypted data, multiregion disaster recovery and SOC2 certification — help protect your data. Alfresco PaaS has integrated process and governance services that deliver content in context with built-in compliance.

5

Managed service

99.9% uptime with managed services. *(Source: Hyland internal data.)*

Hyland's expert management of Alfresco ensures 99.9% uptime, allowing your IT team to focus on strategic initiatives rather than daily maintenance. With real-time monitoring and automatic upgrades, your operations remain smooth and uninterrupted.
