

Ellucian Ethos Connect integration

Update student data more accurately, efficiently
and effectively

Scan/capture
student data

System validates data
to ensure accuracy

Improves process
controls and tracking

The Hyland Ethos integration helps unify student, employee and vendor data across Ellucian, partner and institution applications to provide a single source of truth for a complete student view while reducing manual data entry and preventing the duplication of work and data.

Using Ethos as the integration layer between your Hyland solutions and Ellucian student information system (SIS/ERP) gives your institution access to a toolbox of APIs that eliminate the need for custom integrations. The Hyland Ethos integration automates common tasks such as indexing student documents, populating form data and updating checklists to eliminate unnecessary manual entry and provide immediate data validation. This all ensures that no matter how student information arrives at your institution, it remains up to date and accurate in every system, getting you the most out of your technology investment.

Highlights

- Validate data before sending it
- Real-time data sync between content and SIS
- Receive confirmation of success/failure when passing data between systems

Impact

- Removes the risk of conflicting data across systems
- Reduces manual data entry and duplicated work
- Immediately brings attention to missing or incorrect data
