

PERCEPTIVE CONTENT | PRODUCT SUMMARY

# HYLAND CONTENT PORTAL

Powered by Jadu Central

In an increasingly digital-first world, organizations must find ways to efficiently gather and provide pertinent information online. The need to deliver services digitally is crucial to business continuity, especially for hybrid and remote teams, as paper-based applications and PDF forms can slow down processes and create inefficiencies at multiple touchpoints across your organization.

Hyland's partnership with Jadu provides an integrated portal solution for delivering exceptional digital services — giving employees access to documents and data from any location on their mobile, tablet and desktop devices. The Hyland Content Portal works with Perceptive Content to enable your customers, users and team members to complete online forms, view information and download files whenever they need them. With the Hyland Content Portal, you can create accessible e-forms and responsively designed portal pages that align with your digital branding, giving your customers and constituents a modern public-facing portal experience that provides access to personalized content.

## BENEFITS

Use out-of-the-box functionality to surface data directly from your Perceptive Content environment. Empower your business analysts to build non-technical forms with ease and enable your developers to integrate back-office systems to Hyland Content Portal e-forms.

- Expedite the validation and submission of documents, workflows and data from any device directly into Perceptive Content
- Drive business efficiency with mobile-friendly online forms
- Allow effective and easy access to essential information
- Build portal pages quickly and easily with minimal technical experience
- Deliver optimal user experience on any device with a fully responsive web design
- Enable 24/7 self-service delivery
- Provide personalized content retrieval for each user
- Ensure brand consistency with custom design functionality

## USE CASES

### Higher education

Provide a portal solution that allows university and college students to easily view and interact with data stored in Perceptive Content. Enable online form submissions to power student-related processes.

### Government

Automate the processing of Freedom of Information Act requests for city, state and federal government and public institutions, delivering dramatic financial and resource savings. Turn paper and PDF forms into interactive, dynamic web forms that can be accessed on any device.

### Accounting and back office

Give your vendors and partners a secure portal for sharing information, checking status of requests, accessing documentation and submitting forms. Connect directly into Perceptive Content workflows for streamlined processing and faster customer service.

The Hyland logo is displayed in white text on a teal-to-blue gradient square background.

Hyland

## Insurance

Allow on-site claims adjusters to initiate the claims process directly from their mobile device, enabling them to view and interact with Perceptive Content while out in the field.

## Human resources

Streamline employee communication across your organization, giving them portal access to HR-related forms and content stored in Perceptive Content.

### Hyland Industries Supplier Portal

The Hyland Industries Supplier Portal will allow you to collaborate more directly with our Accounts Payable team. You can use the portal to submit invoices, check on the status of outstanding invoices, review recently published bulletins, and much more. If you need any additional assistance, please feel free to [Contact Us](#) at anytime!
